Seattle WA 98124

Dear Mr. Bivins:

Order of Approval No. 6264 (NOC No. 6264)

I have reviewed your source test plan to satisfy Condition No. 6 of Order of Approval No. 6264. The Source Operations section indicates the plant will provide source operating conditions during the test. This would include parameters such as operational level (% of capacity), amount and kind of fuel usage and steaming rate during the test. During the source test, the equipment need not operate at full capacity. Operate your equipment during the time of testing as it would normally be operated.

Please notify PSAPCA if your test date is postponed. My telephone number in Seattle is 689-4055 or Fax 344-7522, and Elizabeth Gilpin is the inspector.

Sincerely,

Fred L. Austin  
Air Pollution Engineer
